EDUCATION

Ho Chi Minh City University of Technology and Education **2023 - Present**
Software Engineering | GPA: 3.34/4.0

Additional Learning **In progress**
Complete C# Unity 3D Game Development in Unity 6
GameDev.tv / Udemy

PROJECTS

ECHOES INSIDE — 05/2026 – 07/2026

Unity 6, C#, Cinemachine | Personal Project
GitHub Repository | Gameplay Demo | Windows Build

- Developed a multi-scene 2D puzzle game featuring item collection, enemy avoidance, and a timed cooking challenge.
- Implemented Rigidbody2D movement, waypoint-based enemies, player detection, and respawn mechanics.
- Preserved inventory and chapter progress across scenes using a persistent GameManager; integrated event-driven puzzles, dialogue, and cutscenes.

ROCKET BOOST — 10/2026 – 11/2026

Unity 6, C#, Rigidbody Physics, Input System | Guided Project
GitHub Repository | Gameplay Demo | Windows Build

- Built a three-level rocket navigation game with Rigidbody-based thrust, rotation controls, and moving obstacles.
- Implemented collision-driven restart and level progression with audio and particle feedback.

GALAXY STRIKE — 10/2026 – 11/2026

Unity 6, C#, Input System, Timeline | Guided Project
GitHub Repository | Gameplay Demo | Windows Build

- Implemented bounded spaceship controls, mouse-aimed particle weapons, enemy health, and score tracking.
- Coordinated enemy waves, voice lines, and dialogue using Timeline and Signals; integrated destruction effects and level restart.

TECHNICAL SKILLS

- Programming: C#, object-oriented programming fundamentals, C# events.
- Unity: 2D/3D gameplay, Rigidbody physics, Input System, scene management, UI.
- Tools & Packages: GitHub, Cinemachine, Timeline, Animator, Particle System.

ACHIEVEMENTS

- Most Impressive Candidate Award - Startup Wheel 2022 (CHARS Project).
- CHARS project was featured by VnExpress.
